## 产品/机械

### Sputtering Target Materials

Samples of individual lots are permanently archived for future analytical or investigative work. Actual analysis of all target materials are shipped with orders. Analysis of materials are performed by the source mill via ICP, ICP-MS, or GDMS (gas content via Leeco). Our own alloys are analyzed by an independent laboratory or can be done by a laboratory of your choice, we work with several in the U.S. All targets are individually marked with a lot number that is fully traceable to the original melt / source via our customized database.

Manufactures Cathodes and Targets, both Rotary and Planar. Soleras offers unique Vacuum Cast, Plasma Sprayed and HIPed Target materials including Zn, Zn/Al, Si/Al, Cr, Sn and many others. Soleras also does bonding in-house and manufactures Backing Plates/Tubes and vacuum related spare parts.

## 产品和背景

Soleras is a world-leading sputter process solutions company focused on customized approaches that drive improved productivity and performance in large area sputter coating.

What we bring to our business partners:

Best-in-class sputter targets and equipment for large area coating

World-leading in situ process control technology

Comprehensive local technical service and support for coater upgrades, equipment maintenance, capacity expansion and capability improvement  
Combined experience with targets, equipment and sputter process to model and develop new sputter capabilities
