LENOX HIGH TEMPERATURE VIDEO CAMERA SYSTEMS can withstand temperatures up to 4250F and provide high-resolution live video images from inside your furnace. LENOX has the largest selection of both fixed and portable systems assuring you the highest quality, state of the art CCTV system, utilizing the latest CCD video chip technology.

LENOX has the right High Temperature Camera to satisfy the rigorous demands of the glass industry. With a Glass Furnace Camera you can monitor the furnace continuously right from the control room. We can supply: Glass Melter Cameras, Float Glass Furnace Cameras, and Forehearth Cameras, among others.

With a Lenox Furnace Camera you can view::

- The logs
- The melt point
- The bubbling
- Burner performance

Float Glass manufacturers have benefited from using our Tin Bath Periscope to monitor the amount of trim being produced as well as the function of the ADS or Top Knurl Wheels. These units extend into the bath and observe the wheel and the trim level at the optimal head on perspective. These units are typically 10.5 feet long and are supplied with side viewing, which furnishes the optimal direct view.

The LENOX BORESCOPE/ENDOSCOPE line offers exceptional value with the following products:

- Flexible Fiberscopes
- Rigid Borescopes
- Micro Borescopes and Flexible Micro Fiberscopes
- Sectional Borescopes
- Videoscopes
- Periscopes

Typical applications for LENOX BORESCOPES:

- Turbine Inspection
- Diesel Inspection
- Engine Inspection
- Medical Tubing Inspection
- Covert Surveillance
- Casting Inspection
- Pipe and Tube Inspection
