The inspection and conveyance lines are made up of several modules that can be grouped in different ways to get the best lay-out according to the customers premises and adequate infrastructure facilities.

This product is designed to meet the clients technical and production needs and incorporate the latest technologies developed for the articles conveyance.

Our experience in implementing this product offers the highest quality, simplicity, robustness and flexibility.

The control system is based on PLC systems, integrated network communication, speed variation (Movimot) and software tailored to the client.
