TIGER Drylac® Powder Coatings

... are solvent-free and comprise of various synthetic-resins, pigments and special additives for a high quality surface finish. Since the early 1960's industrial powder coating technology has developed into a viable alternative to liquid coatings. Combining economic and ecological advantages powder coatings represent the future of paint technology. Powder Coatings are manufactured in three steps, pre-mixing of raw materials, extrusion and micronising, resulting in a fine powder. Depending on the specific application, the powder particles are then processed into a certain size distribution.

Company Profile of **Tiger Coatings GmbH & Co. KG**

A service of glasssglobal.com, an affiliate of glasssglobal group.
