产品/机械

SicurGuard® is a closed glass formed of two or more panes and one or more interposed layers of plastic material bonding the glass panes tightly together over the entire surface

SicurLite® is a closed, hard combination of joined panes, made from glass and polycarbonate

SicurAlarm® - glass provides the highest possible standard for glass surveillance, especially doors and (shop)windows

We are producer and supplier of special protective-windows for machine tools. Our origin field of activities are all kinds of compounds between glass and polycarbonate. The CE-marking for machine tools includes a conformity declaration for the protection of operators against the risks from ejected parts. In order to meet the requirements for impact resistance according to the European Norm prEN 12415 (turning machines), prEN 12417 (machine centers) and prEN 13218 (grinding machines) and to provide longterm clear visibility of the windows and stability of the impact resistance, we developed our SicurTec® - protective window for machine tools
