产品/机械

High quality lead crystal tableware Glass is an important part of this culture. In addition to having wonderful characteristics that allow it to be molded into any shape and infused with a wide range of colors, glass can retain a beautiful luster almost indefinitely. We melt the raw materials used in our glass at temperatures exceeding 1,400, and control the formation of the glass through masterful heat management and the use of precision molds. We shape the glass using our own special rolling and stretching techniques, creating beautiful glassware that is expressive of our sensitivity and creativity.

TSG offers top-quality printing and after processing services catering to the needs of our customers.

Screen Printing

TSG offers advanced screen printing services for multi-color graphics and designs on the glass. In addition to the standard printed glassware collection in our catalog, screen printing is also available for publishing your company logos, names and graphics which turns TSG glassware into excellent advertising media for your business. Standard ceramic inks, semi-transparent inks, and crystal ice textured inks are available to serve your needs.

Sandblasting

Frosted designs are created by high pressure sandblasting equipment. Sandblasting is a process in which fine silicate particles are blown onto the glass surface to produce the graphics desired.

Cut Glass Processing

Beautiful cut patterns are engraved by fast-spinning diamond wheels using original cutting technologies developed by TSG.

Laser Marking

State-of-the-art laser marking devices are employed to imprint letters or graphics onto/into the glass.

Company Profile of **Toyo Sasaki Glass Co., Ltd**

A service of glasssglobal.com, an affiliate of glasssglobal group.
