Light for Professional Use

ZORN lighting know-how can be found in numerous technical applications. ZORN doesn't supply off-the-shelf lamps, but rather develops individualised solutions. Requirements such as brightness, service life, colour temperature and spectral range are precisely ascertained and brought to fruition in the form of optimised results in cooperation with the customer. And we don't just offer advice with regard to the light source, the type of glass and the lamp socket. Details like dimensioning of the light bulb and a requirements analysis for later series production are part of the standard programme at ZORN. Our philosophy is named: "Focus on Quality". We assure quality throughout the entire development and manufacturing process by means of extensive material and production inspections.

Company Profile of **Zorn GmbH & Co KG**

A service of glasssglobal.com, an affiliate of glasssglobal group.
