产品/机械

The range of products extends from fused quartz hollow cylinders, tubes, staves and profiles to process reactors with large diameters and products processed via glass-blowing.

ilmasil® - fused quartz is produced by our in-house developed plasma fusion method. In a rotating furnace mold high purity quartz crystalline material is melted to fused quartz glass cylinders (billets) using a high power plasma arc.

This environment friendly fusion method promotes a high degree of flexibility in geometry as well as material properties.

- Cylinders
- Clear Tubing
- Profiles / Rods
- Translucent Tubing
- Capillaries
- Laboratory Ware
- Flat-, Oval-, Twin Tubing
- Special Appliances
- Process Tubing

Company Profile of **QSIL GmbH**

A service of glasssglobal.com, an affiliate of glasssglobal group.
