产品/机械

Patterned and wired glass:

Our plant specializes in patterned and wired glass production.

Patterned sheet glass is one of the most asked-for materials widely used in different branches of industry. Patterned glass transmits slightly less light than clear glass, designs impressed on glass make it decorative, so owing to combination of such qualities patterned glass can be used for creating expressive interior designs and decorations.

Wired glass is a product in which a wire mesh has been inserted during production. In case of breakage of such glass, the mesh retains the pieces of glass.

Glass bottles:

We produce a wide spectrum of narrow-necked glass bottles for bottling champagne and sparkling wines, vodka, cognac, soft drinks, as well as glass bottles for household chemicals.

The plant accepts orders for narrow-necked glass bottles to be produced according to the client's custom design.

Glass blocks:

Glass blocks of different designs and colors produced by our enterprise can be used in a wide range of applications.

Glass blocks' production is temporarily suspended.
