PV Curtain Wall

Nowadays architecture and photovoltaic solar energy can be combined to create a new form of construction.

Curtain walls offer architects a multitude of possibilities for the integration of photovoltaic solar energy into buildings in an efficient and ecological manner.

The large variety in form, structure and colour of photovoltaic glass, combined with the aluminum frames, provides a free reign of creativity for the Project workers so they can create designs which unite elegance, efficiency and energy saving.

Onyx Solar can customize the photovoltaic glass to supply it in different sizes, colours and degrees of transparency. These characteristics mean that it is the ideal material for installation as a photovoltaic curtain wall.

Company Profile of **Onyx Solar**

A service of glasssglobal.com, an affiliate of glasssglobal group.
