Industry - Focus on Glass

Our success is the success of our customers. Our long term business connections prove: Many of our customers – medium sized enterprises as well as renowned concerns – trust the Cleanfix service since the company's foundation in 1990. For us, this is evidence for a high quality partnership that goes far beyond the traditional provider / customer relationship.

The different Cleanfix business areas focus on the glass industry. Especially the flat glass industry and the glass processing companies profit from our profound service. We realise small projects in the area of cullet removing and industrial cleaning but also assume selected production processes. This includes the system operation, the packing of finished glass products according to standards as well as the organisation of the packed units and their securing in different means of transport. In doing so, the special needs of our customer are always our main concern.

The Cleanfix-Group offers Business Process Outsourcing. For you as our customer, we take care of sub-processes or entire business processes which are not part of your core business. This allows you to optimise your work flow and reduce costs – without uneasy compromises in regard to quality. Cleanfix also takes responsibility for the operating risk that comes along with the project.

By outsourcing business processes you gain more capacities for both your core business and your employees. Cleanfix provides an elaborate analysis, regular reports and invoices and thus guarantees the necessary transparency. This gives you full insight in the project's progression and its current costs.

Company Profile of **Cleanfix-Group**

A service of glasssglobal.com, an affiliate of glasssglobal group.
