

Recycling of precious metals

Recycling of valuable raw materials

For the production of bulk, honey comb and metal catalysts different precious metals and rare earth elements are applied. More than 35 years of experience in the field of catalyst development and manufacturing and application stand for best service for our customers.

Your application

- Decreasing efficiency of the catalysts due to
 - ◆ Presence of catalyst poisons
 - ◆ Thermal overload
 - ◆ Surface coverage by dust or polymerisation
 - ◆ Mechanical damage

Your advantages

- Up to 97% (less additional charges) of the precious metal money equivalent depending on the daily world market price can be reimbursed to the customer

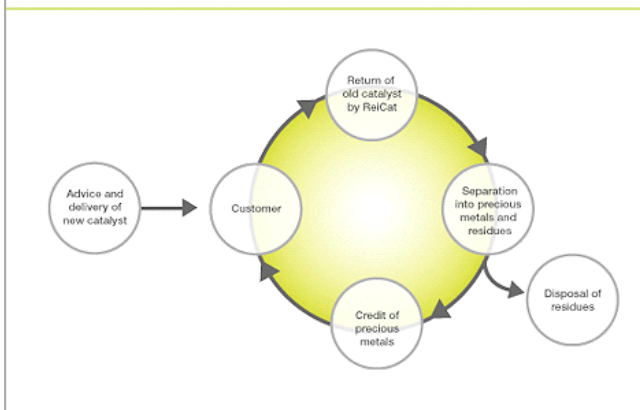

Our Solution

- ReiCat takes back the catalyst at the end of its life cycle for recycling.

Special features

- Analysis and certification of exact precious metal content

Procedure of Catalyst Recycling
