

【Glass melting electrode】

～ Furuya Metal has developed IRIDIUM ELECTRODE for Glass Melting Furnace ～

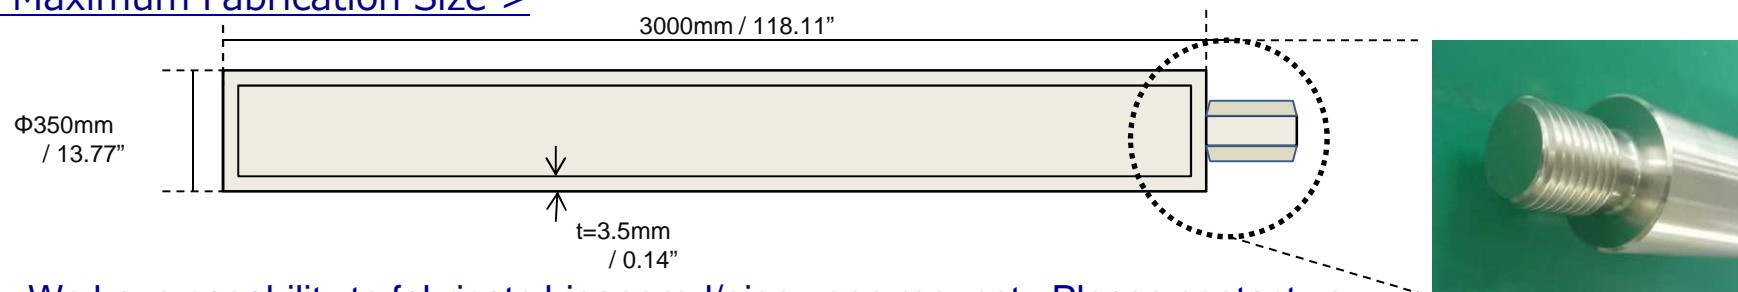

< Superior High Temperature Properties of IRIDIUM >

< Experienced Fabrication Technology >

Although it is well known that IRIDIUM is very difficult to fabricate, Furuya Metal has an experienced technology to fabricate IRIDIUM to various shapes by using the super high purity ingot made from our unique melting technology. (Pipe design is also available for less IRIDIUM)

< Maximum Fabrication Size >

•We have capability to fabricate bigger rod/pipe upon request. Please contact us for any further requests.
