产品/机械

Mara® *Tech* MGO (pad & screen)

MaraTech MGO is a onecomponent and at the same time highly resistant ink for glass materials and metals. It can be processed in screen and pad printing.

Advantages

- Cost-efficient: One-component baking ink for glass and metal
- Economical stocking: Designed for screen and pad printing
- Meets highest demands on adhesion, chemical and dishwasher resistance
- Suitable for sensitive applications such as baby bottles

Ultra *Glass* UVGL (screen)

Substrates

Coated substrates

Anodised aluminium
Metals
Glass & ceramics

The UV-curable, 2-component UltraGlass UVGL requires no additional post baking while guaranteeing highest resistances. This reduces energy and investment costs and provides efficient production through high production speeds.

Advantages

- Efficient production as no oven baking necessary
- Enormous energy, time, and space saving
- Excellent dishwasher and further resistances
- Formulation without critical heavy metals like lead, or cadmium

Mara® Shield UV-CGL (liquid coatings)

UV-curable ink for full-area roller coating onto flat glass.

- 2-component coating
- Very good adhesion to glass
- Very high chemical and mechanical resistance
- High opacity

Mara® Glass MGL (screen)

Substrates

Glass & Ceramics
Anodised aluminium
Coated substrates
Metals

MaraGlass MGL is a solvent-based, two-component screen printing ink for indoor decoration prints onto glass, metal, ceramics, chromeplated, and coated surfaces. If a high chemical or water resistance is required the printed ink film must be tempered for 30 min at 140°C.

Advantages

- Highly pigmented opaque shades as well as additional colour pastes for mixing possibilities and opacity as required
- High chemical, filler, and dishwasher resistance
- Silicone-free and suited for laminating
- MGL standard shades are free of aromatic compounds and comply with IKEA Standard MAT-0066

Tampa® Glass TPGL (pad)

Substrates

Glass & Ceramics
Metals
Coated substrates
Thermosetting plastics
Anodised aluminium
Chrome-plated parts

Glossy, fast drying 2-component pad printing ink for glass and many other substrates. TampaGlass TPGL impresses with excellent appearance, is easy to use and universally applicable thanks to very good adhesion and high resistances.

Advantages

Outstanding ink flow, easy processing
Very high mechanical, chemical, fill goods, and dishwasher resistance
Highest efficiency thanks to fast printing speeds
Wide substrate range

产品和背景

Marabu is a leading global manufacturer of liquid coatings and screen, digital, and pad inks with headquarters near Stuttgart, Germany. Marabu's track record of innovation stretches back to 1859, featuring many industry-first solutions for both industrial applications and graphic design. With its 14 subsidiaries and exclusive distribution partners, Marabu offers high-quality products and customer-specific services in more than 80 countries. Exceptional technical support, hands-on customer training, and environmental protection are core elements of its corporate philosophy. Sustainable business practices are also key to Marabu's vision. These have been implemented through a number of initiatives, with concrete results – and the company is committed to maintaining this course of action in future. Marabu has been certified to ISO 9001 since 1995 and to ISO 14001 since 2003.

Company Profile of **Marabu GmbH & Co. KG**

A service of glassglobal.com, an affiliate of glassglobal group.
