产品/机械

Main area of expertise of the company is development and production of the process equipment and microprocessor control systems for workshops producing glass mixture and different multicomponent mixtures.

Stromizmeritel Closed JSC is ready to provide to the customer a wide range of services and can perform the following work:

- design of modern batching plants and storage and processing departments for sand, dolomite, limestone, glass cullet and other raw materials;
- development, production and packaged supply of weighing and dosing, transportation and process and other equipment for batching and machine plants as well as departments for processing of raw materials and glass cullet;
- development and production of the computer control systems and automation aids;
- software development;
- installation supervision and equipment assembly;
- commissioning and start-up, putting of the equipment into operation and personnel training;
- after-sales service;
- supply of spare parts and modernization of equipment.

Many glass industry factories in Russia and the countries of the near abroad as well as many companies in Western Europe, Africa and China are among our partners.

The success of the company is based on precise fulfillment of contractual obligations, optimal quality-price ratio, highly skilled specialists as well as on innovative approach to solution of the set problems.
