产品/机械

Chemetall produces high performance products for the glass industry. The product range covers cutting fluids, coolants and interleavants as well as polishing agents, washing compounds, flocculants and more. The aim of Chemetall has always been to solve customer problems, to increase their productivity and to improve the quality of their products. Therefore, Chemetall operates in close partnership with leading glass processing equipment manufactures. Continuous research work of our laboratories ensures that our products are always leading in technology and performance.

Interleaving Powders

During the transport of float glass, adhesive forces and chemical reactions can cause the panes to stick together so strongly that they cannot be separated again later on. Furthermore, transportation or storage creates a risk of glass surface corrosion. Chemetall's innovative interleavant powders can effectively counter adhesion or scratching of panes as well as surface corrosion.

First-class raw materials and quality control

In addition to traditional powder products providing corrosion protection, we offer liquid products which can be sprayed onto the float glass in the form of an aqueous solution. For the whole product range, Chemetall ensures the use of only first-class raw materials and continually monitors quality control so that our customers can profit from our know-how for a particularly long time.

Our Technology Portfolio:

- Interleaving powders
- Liquid anti-stain products for spray application
- Interleaving powders with (anti-stain) properties

Industries we serve:

- Glass producing industry
- Glass processing industry
- Flat glass industry
- Optical glass industry

Company Profile of **BASF Chemetall GmbH**

A service of glasssglobal.com, an affiliate of glasssglobal group.
