国家	德国

产品/机械

screen printing machines

Squeegee blades for all requirements:

RKS-produced fiberglass profile sections are suitable for all modern screen printing applications. One example consists of the highly elastic sections - designed for manual printing and simple screen printing machines - which are capable of compensating for the possible unevenness of the printing materials or printing platforms used. The blades produced for precision screen printing machines, on the other hand, have relatively less elasticity. The following methods are available for holding RKS squeegee blades in place.

Screenprinting, framing, painting and texturing tools

Company Profile of **RK Siebdrucktechnik GmbH**

A service of glasssglobal.com, an affiliate of glasssglobal group.
