产品/机械

SolidWorks® software for 3D for design of products, machinery, and tooling f.ex. moulds. SolidWorks software to design blow-mold and press mold machines that produce the actual glassware. SolidWorks software's parametric change capabilities are critical for this work: A beer mug, beer glass, wine glass, and water glass have similar but different multi-piece mold assemblies that must fit machines and support established processes. With SolidWorks software, engineers can work from master designs and change parameters for the new products.

Company Profile of **SolidWorks Corporation**

A service of glasssglobal.com, an affiliate of glasssglobal group.
