产品/机械

LMI Technologies Inc. (LMI) is an integrated research, development, engineering, and manufacturing group producing Sensor Vision technology for production automation. Since 1976, LMI has applied its expertise in optical inspection to build sensors that simplify automated vision, measurement, and control metrology worldwide for 1000's of machine vision applications.

Vision sensors are employed throughout the glass production industry. For example, glass measurement sensors need to detect the smallest of defects in the micron and sub-micron ranges on the thinnest, clearest and most reflective of surfaces. Using application specific laser lighting and image processing software to extract thickness information from the laser as it passes through the glass ensures accurate measurements are consistently achieved in real time.

Market managers work closely with System Integrators & Machine Suppliers to deliver the most effective solutions for your particular sensor vision needs.

Company Profile of **LMI Technologies Inc.**

A service of glasssglobal.com, an affiliate of glasssglobal group.
