## 产品/机械

Photovoltaic

Optical quality control in wafer, solar cell and modul production provides a crucial contribution to high product quality and distinct product classification

Inspection solution for complete production

Optical quality control in wafer, solar cell and module production provides a crucial contribution to high product quality and distinct product classification. Image processing systems from VITRONIC offer reliable and highly accurate assessment - within production cycle times. The VINSPECsolar range of products offers a tailored inspection solution for every relevant production step. Several dozen engineers and service technicians guarantee rapid, effective support and adaption to individual costumer requirements.
