地址	<b>Nogrid GmbH</b> Am Kümmerling 21-25 55294 Bodenheim
国家	德国

## 产品/机械

Nogrid started in the year of founding with a new, unique CFD (Computational Fluid Dynamics) software for the simulation of flows: **NOGRID points** is based on FPM (Finite Pointset Method). This FPM method has been developed and validated in collaboration with the Fraunhofer-Institute in Kaiserslautern over the past 14 years. NOGRID points can excellently be applied in the case of all problems, where grid-based methods reach their limits due to the necessary remeshing

In the meantime Nogrid has put a second new and professional CFD software product on the market: **NOGRID pointsBlow** is the only software worldwide, that is able to simulate the process of glass forming of containerglass in an absolute professional way and to show the results in full 3 D.

NOGRID *pointsBlow* software allows to simulate all three kinds of container glass forming processes:

- BB (Blow and Blow)
- PB (Press and Blow or Wide Mouth PB)
- NNPB (Narrow Neck Press and Blow)

### Company Profile of **Nogrid GmbH**

A service of glasssglobal.com, an affiliate of glasssglobal group.
