国家	中国（中华人民共和国）

产品/机械

Automotive Laminated Glass
Automotive Tempered Glass
SOLAR X reflective laminated glass
PU Encapsulation laminated and tempered glass
Decorative PVC plastic moldings
Attachments for Auto glass

Production Capability

Tempered glass with thicknesses of 3.2mm, 3.5mm, 4.0mm, 5.0mm and 6.0mm can be produced for automobile applications.

Special Tempered Glass with Antenna Capability

This specialty product is capable of receiving signals from GPS, TV, HCD, FM and AM frequencies, in addition to its ordinary heating capability.

Product Characteristics

- 1.It can replace telescopic antenna and avoid the troubles of the in and out operations of the antenna.
- 2.When the heating element is activated, it can rapidly increase the temperature of glass surface to 40°C ~75 °C, and prevent fogging, frosting or icing on the glass surface during cold winter conditions.

Production Capacity

Various glass thickness of this special product such as 3.2mm, 3.5mm, 4.0mm, 5.0mm, 6.0mm, 8.0mm can be produced.

SOLAR-X solar reflective laminated glass is a proprietary product developed by ourselves. It is based on innovative coating technology that applies a special coating onto the glass surface, which can effectively reduce solar radiation. This innovative product has successfully captured the domestic market.
