"China (Beijing) International Photovoltaic Industry New Technology New Material New Product New Equipment Exhibition"

With the shortage of the global energy situation, people casting their eyes on renewable energy, solar energy is particularly important for its unique advantage. Abundant solar radiation is an important source of energy with its inexhaustibility, free of pollution, low cost and convenience for human using.

For the implementation of China's commitment of energy-saving and emission reduction targets to the world, to strengthen the policy support of new energy, to further promote solar PV technology applications in urban and rural construction, to accelerate the innovation of solar photovoltaic technology enterprises and to enhance the overall level of photovoltaic industry, the China High-tech Industry Commission, China Architecture Design & Research Group Building Energy Engineering Center, Building Materials Sub-council of the China Council for the Promotion of International Trade, China Energy Conservation Association together with China Chamber of Interantional Commerce cosponsored the CIPV EXPO China (Beijing) International Photovoltaic Industry New Technology New Material New Product New Equipment Exhibition(China PV Four New Exhibition) which will be held in Beijing China International Exhibition Center
