Design

At Contour, your imagination is our greatest design asset. If you can imagine a design for glass applications in the refrigeration market, we can fire your design onto glass bringing you aesthetic value and rigid requirements for dimension and temper. Since you are always looking for ways to improve your product quality and style, so are we.

Just ask us to help you create something unique that sets you apart, and we will bring your imagination to fruition. Just remember that when you have a design problem, Contour may be your best solution.

Graphics

Whether the graphics for your refrigeration glass is designed to be subtle or dramatic, Contour has the in-house capabilities to make your design become a reality. We work with your concept design professionals to set the appropriate printing requirements; select the best silk screen to give just the right effect; prepare the graphics and registration for multiple colors; and, mix custom color inks to give you exactly what you ordered. And, since all of our process functions are in-house, we can give you extraordinary service and execution time.
