## 产品/机械

building systems, solar, steel tubes and plastics

### Jansen building systems

Jansen develops and produces well-designed, high-quality profile systems for windows, doors and facades in steel and stainless steel. In addition, Jansen markets profile systems manufactured from aluminium, timber-metal and plastic by Schüco. Through its extensive range of products and their huge variety of applications, Jansen sets new standards with respect to quality, design, energy efficiency, safety, security and durability – completely in accordance with the slogan: "Form and function perfectly united".

### Jansen solar systems

The future-oriented Schüco photovoltaic and solar thermal systems from Jansen turn any building into a power station: photovoltaic panels convert sunlight efficiently into solar electricity, conserving resources and protecting the environment, while solar thermal panels capture heat from the sun. The result is lower electricity and heating costs.

### Company Profile of Jansen AG

A service of glasssglobal.com, an affiliate of glasssglobal group.
