产品/机械

ENGIE's electricity supply chain incorporates the centralized production of low carbon electricity and electricity produced from renewable sources like hydroelectricity, biomass, wind power, and solar power. This is complemented by production from the trade and sale of electrical energy.

The Group's traditional area of expertise, ENGIE's gas sector incorporates traditional activities based around the supply, distribution, trade, and sale of gas, as well as the use of new gas technologies. The Group harnesses its expertise for an integrated approach to innovation in the transport and storage of gas, as well as the development of biogas and Power to Gas solutions.

ENGIE offers a comprehensive range of energy services, combining innovative digital technology with new uses for energy, to provide an ever more competitive response to the needs of all of our customers. With a presence in the energy efficiency markets in more than 30 countries, ENGIE designs and implements energy services using a range of techniques.

Company Profile of **ENGIE**
