## PRODUCTS OR MACHINERY

Refractory Recycling

## COMPANY BACKGROUND / HISTORY

REF Minerals is an European based company operating worldwide since 1997, through its own subsidiaries and partners recycling secondary refractory materials.

Today REF Minerals operates in more than 50 countries mainly in glass, fiber glass, metallurgical and ceramic industries, offering following services:

- Dismantling furnaces
- Sorting refractory debris
- Cleaning of materials
- Waste management and disposal services
- Processing secondary raw materials

We operate our own processing plants, enabling us to produce different sizes and qualities.

REF Minerals is a supplier of recycled secondary raw materials based on Zirconsilicate, Zirconoxide, Chromium, Aluminium oxide, etc. to serve the refractory and ceramic industries. We contribute saving natural resources and support our customers to benefit from sustainable reuse of reclaimed materials. Among our long term customers are most of the worlds leading refractory and ceramic companies.
